

## Times Tables and Multiplication Sums

Want to get ahead in your class? Now you know your times tables, you can use them to whizz through these sums at great speed.

There are easy ones, middle sized ones and jolly long ones. Don't worry – you don't have to do them all in one day. You can spread them out a bit!

First of all you can warm up by just multiplying by one digit:

1.  $27$   
 $\times 4$

2.  $17$   
 $\times 6$

3.  $39$   
 $\times 3$

4.  $15$   
 $\times 9$

5.  $45$   
 $\times 8$

6.  $44$   
 $\times 2$

7.  $63$   
 $\times 5$

8.  $71$   
 $\times 8$

9.  $97$   
 $\times 7$

10.  $30$   
 $\times 3$

11.  $43$   
 $\times 6$

12.  $48$   
 $\times 4$

13.  $96$   
 $\times 1$

14.  $17$   
 $\times 7$

15.  $52$   
 $\times 9$

16.  $98$   
 $\times 2$

17.  $54$   
 $\times 5$

18.  $19$   
 $\times 7$

19.  $91$   
 $\times 4$

20.  $69$   
 $\times 6$

21.  $51$   
 $\times 8$

22.  $38$   
 $\times 8$

23.  $28$   
 $\times 2$

24.  $20$   
 $\times 3$

25.  $15$   
 $\times 5$

Now try multiplying by two digit numbers. Don't forget to put the zero in where necessary.

Sometimes we need to multiply quite long numbers by one or two digits, so here is some practice in these skills. You will need to be able to do this if you want to tackle the cross-figures later.

$$\begin{array}{r} 84. \quad 253216 \\ \times 7 \\ \hline \end{array}$$

$$\begin{array}{r} 85. \quad 846364 \\ \times 9 \\ \hline \end{array}$$

$$\begin{array}{r} 86. \quad 4275937354 \\ \times 6 \\ \hline \end{array}$$

$$\begin{array}{r} 87. \quad 327531 \\ \times 5 \\ \hline \end{array}$$

$$\begin{array}{r} 88. \quad 521744 \\ \times 4 \\ \hline \end{array}$$

$$\begin{array}{r} 89. \quad 93625412 \\ \times 8 \\ \hline \end{array}$$

$$\begin{array}{r} 90. \quad 327631 \\ \times 23 \\ \hline \end{array}$$

$$\begin{array}{r} 91. \quad 812538 \\ \times 58 \\ \hline \end{array}$$
